

PRESS RELEASE: European Commission approved reimbursement of net costs to Česká pošta

6.2.2025 - Tereza Meravá | Český telekomunikační úřad

Based on the notification submitted by the Czech Republic, the European Commission has assessed the compatibility of this reimbursement, which constitutes public aid, with EU rules and the internal market and concluded that the reimbursement and its amount (maximum reimbursement of EUR 1.5 billion per year) are compatible with these rules.

Following the European Commission's decision, CTU will finalise the proceedings for the reimbursement of net costs, or preliminary net costs, so that Česká pošta can be reimbursed for the verified amount of net costs representing the disproportionate burden incurred by it as a result of fulfilling its obligation to ensure the availability of universal services throughout the Czech Republic.

For more information, see the European Commission press release (the link below):
https://ec.europa.eu/commission/presscorner/detail/cs/mex_25_399

The Commission will subsequently publish the full text of the decision in a version from which all confidential information will be excluded.
