

Leighton Asia awarded works for a data centre project in Thailand

17.7.2026 - | HOCHTIEF AG

Leighton Asia has been awarded a contract by NTT Global Data Centers to deliver fit-out works at its Bangkok data centre campus in Thailand. This award further strengthens Leighton Asia's portfolio in the Asia Pacific data centre sector and supports its expansion in digital infrastructure markets.

The project involves the fit-out and mechanical, electrical and plumbing installation for data halls, supporting infrastructure and associated systems. The works form part of NTT's continued investment in digital infrastructure in Thailand.

ACS Group and HOCHTIEF Chief Executive Officer and CIMIC Group Executive Chairman Juan Santamaría said:

“The demand for digital infrastructure continues to grow globally, requiring experienced partners capable of delivering highly complex, mission-critical facilities. This award reflects the confidence our clients place in the capabilities of our Group and strengthens our position in the data centre sector.”

Leighton Asia Managing Director Brad Davey said:

“We are pleased to be partnering with NTT Global Data Centers on this important project. As a vertically integrated contractor, Leighton Asia supports clients in delivering critical digital infrastructure through construction, installation and commissioning.”

The project is scheduled to commence immediately.
