

Earn continuing education and college credits for AI educator training.

18.9.2026 - | Google Italia

The Google AI Educator Series, our bite-sized, 15-minute training sessions for educators, now has a new way to showcase what you've learned:

- Undergraduate credit: Participants can now earn undergraduate college credits starting later this year, at no cost, through our partnership with College Unbound.
- Graduate credit: And thanks to our partnership with ISTE and Dominican University, educators can also turn their new AI skills into fully accredited, graduate-level college credits.
- Continuing education credit: Educators and administrators in Illinois can earn hours toward their license renewal through our partnership with the Illinois Digital Educators Alliance.

To start earning credit today, join the Google AI Educator Series Badge-a-thon, a flexible, drop-in festival on September 19. Join our 12 hour webinar at any time to watch live educator demos, learn time-saving tricks, and earn ISTE-aligned digital badges. Register today at goo.gle/GESBadgeathon.
