As the cost of living continues to rise, managing expenses has never been more critical. That's why we're launching fuel prices in the UK on Google Maps and Waze.

Teaming up with the UK Government and the UK Waze community, this feature uses Fuel Finder to give motorists a real-time look at petrol and diesel costs at nearby stations.

Instead of guessing or defaulting to the nearest forecourt, you can easily track down the best value for your tank, quicker than ever:

- Seamless stops: Search for “petrol” or “fuel” on Maps or Waze to see the latest prices.
- Spot the best deal: View petrol and diesel rates directly on the map.
- See fuel types: View prices for all the different fuels offered by a station in one place.

Everyday journeys are now simpler and more affordable, showing Brits where best to buy their fuel. Give it a try!
