

Sustainability at Fresenius: Taking care of people and the planet

8.6.2026 - | Fresenius SE & Co. KGaA

At Fresenius, we are committed to life. As a healthcare company, taking care of people is in our DNA. This also extends to taking care of our planet. Because people need a healthy home to live a healthy life.

Our Sustainability Framework

Our mission is to save and improve human lives. Sustainability helps us deliver on this mission by focusing on opportunities that arise from sustainable business practices and turning them into measurable progress.

Our approach built on a unique corporate legacy spanning more than a century and is guided by [strong principles](#) and a clear direction for the future.

Our Sustainability Framework translates this approach into action. It structures our activities across three dimensions and nine focus topics, providing clear orientation and a consistent direction across the Group.

We focus on three core dimensions:

□ [Human Dimension](#)

□ [Planet Dimension](#)

□ [Ethical Foundation](#)
