

Integral Milk Price FrieslandCampina

September 2026: 47.71 euros

31.8.2026 - | Koninklijke FrieslandCampina N.V.

Guaranteed Price increases to 44.00 euros per 100 kilograms of milk.

The Guaranteed Price for September increases by 1.50 euros to 44.00 euros per 100 kilograms of milk. This increase reflects the expectation that farm milk prices paid by the reference companies in Northwestern Europe will show an upward trend in the coming period. In addition, the increase is due to a correction for the previous period.

The Integral Milk Price that FrieslandCampina pays to its member dairy farmers for conventional milk is based on the Guaranteed Price, supplemented by the maximum Foqus planet premium for sustainability efforts and a quantity bonus, after deductions for charges and costs. Member dairy farmers may also receive an additional Supplementary Cash Payment, depending on the company's results and the retained earnings policy.

Value milk components September

This month the protein value is 614.35 euros and the fat value is 491.48 euros per 100 kilograms of milk.

(3.58% protein and 4.45% fat)
- 2026 is based on Milk Payment Regulations 2026-2028
(3.57% protein and 4.49% fat)

Explanation Integral Milk Price

The Integral Milk Price provides insight into the total remuneration that FrieslandCampina member dairy farmers may receive per 100 kg of conventional milk. The monthly milk payment for each dairy farmer is calculated based on the value of protein and fat in a fixed ratio (5:4) and the Guaranteed Price for conventional milk at 3.57 percent protein and 4.49 percent fat, excluding VAT, per 100 kg of milk.

The Guaranteed Price is determined by the milk prices paid by various reference companies in Northwestern Europe to dairy farmers, based on an average annual delivery of 1,000,000 kg of milk. The difference between the Guaranteed Price and the milk payment arises from the deduction of charges, costs, and bonuses.

In addition to the Integral Milk Price, FrieslandCampina members may receive a supplementary cash payment, the amount of which depends on FrieslandCampina's results, and the retained earnings policy adopted.
