

Create your best tracks yet with Lyria 3.5 in Gemini.

4.9.2026 - | Google Italia

Lyria 3.5, our best-sounding music generation model, is now available in the Gemini app and the Gemini API. Lyria 3.5 brings more expressive vocals and richer musical arrangements, allowing you to craft tracks with higher fidelity.

In the Gemini app, you can now:

- Easily select or describe your genre and choose between vocal or instrumental styles
- Use our new templates to jumpstart your creativity for anything from background music to custom birthday tracks
- Plus, you'll now have the flexibility to choose short or longer tracks

Whether you need a custom backing track for a video, a unique brand jingle, or just a personalized ringtone, it's easier than ever to bring your idea to life.

Lyria 3.5 is available to all users globally on the web and in the mobile app. It's also available for artists and AI creatives in Google Flow Music, and for developers and technologists through Google AI Studio, and Google Vids.
