

Pictet Lists AI Enhanced Equity ETFs at SIX Swiss Exchange

10.9.2026 - Julian Chan | SIX Group AG

Today, SIX welcomes Pictet as a new ETF issuer at SIX Swiss Exchange with the listing of AI Enhanced Equity UCITS ETFs. The new range gives investors access to actively managed equity strategies that combine Pictet’s quantitative investment expertise with artificial intelligence-driven stock selection across global, US, European and world ex-US equities.

The newly listed Pictet AI Enhanced ETF range is designed to provide core equity-market exposure while seeking incremental outperformance versus the respective benchmarks. The strategies use a proprietary AI model that identifies complex patterns across company and market data and translates these insights into stock-selection signals, while Pictet’s quantitative investment team oversees the process and portfolio construction.

With this launch, Pictet becomes the 38th ETF issuer at SIX Swiss Exchange, further strengthening the breadth of its ETF segment and supporting investor access to innovative active ETF strategies from one of Switzerland’s leading asset managers.

Denis Kocaman, Head of Intermediaries Switzerland at Pictet, comments: “With the listing of our AI Enhanced Equity UCITS ETFs at SIX Swiss Exchange, we are making innovative active ETF strategies available to Swiss investors through a familiar, transparent and efficient exchange-traded format. The range combines Pictet’s quantitative investment expertise with advanced AI techniques and is designed to provide investors with core equity-market exposure while seeking incremental outperformance.”

Danielle Reischuk, Senior ETFs & ETPs Sales Manager, SIX Swiss Exchange, adds: “We are pleased to welcome Pictet’s AI Enhanced ETF range to SIX Swiss Exchange. The launch underlines the continued evolution of the ETF market and broadens the choice available to investors in Switzerland. We thank Pictet for choosing SIX Swiss Exchange as listing venue and wish them strong investor interest and successful trading in these new products.”
