

# ISKRA Strengthens Connections at Electric & Power Indonesia 2026

11.9.2026 - | Iskra

**ISKRA successfully participated in Electric & Power Indonesia 2026, held from 2 to 5 September at JIEXPO Kemayoran in Jakarta.**

As one of the region's key exhibitions for the power generation, renewable energy and electrical equipment industries, the event brought together industry professionals, technology providers, distributors, utilities and business leaders from Indonesia and beyond.

## Connecting with customers and partners

Throughout the exhibition, the **ISKRA team welcomed numerous visitors to Booth A1-1021**, creating valuable opportunities to meet with existing customers and partners from Indonesia and the wider Southeast Asian region, as well as new strategic customers and potential business partners.

The meetings provided an opportunity to exchange insights, discuss market needs and explore new possibilities for cooperation in the rapidly developing Indonesian energy market.

Indonesia's energy sector is undergoing significant transformation, with increasing focus on renewable energy, energy efficiency and the modernization of transmission and distribution infrastructure. The exhibition highlighted the importance of technologies that can support a more reliable, efficient and sustainable energy system.

## Exploring opportunities in a growing market

For ISKRA, participation in Electric & Power Indonesia 2026 was an important opportunity to strengthen its presence in the region and build new relationships across the electrical and energy sectors.

The exhibition's broad industry profile closely aligns with ISKRA's expertise, covering areas such as **electrical distribution and transmission, metering and smart metering, switchgear, testing and measurement, energy efficiency and renewable energy solutions.**

With Indonesia continuing to invest in the development and modernization of its energy infrastructure, the market offers significant opportunities for technology providers and industry partners. The event provided a valuable platform for ISKRA to engage directly with the market and identify opportunities for future cooperation.

## Looking ahead

ISKRA would like to thank everyone who visited our booth, met with our team and took the time to discuss potential opportunities.

**We look forward to building on the connections made in Jakarta and continuing to develop strong partnerships in Indonesia and across Southeast Asia.**

**Thank you to everyone who made Electric & Power Indonesia 2026 a successful and productive event for ISKRA.**
